Summary

Java Full Stack Developer with internship experience building 15+ production-grade REST APIs using Java, Spring Boot, PostgreSQL, and Spring Security. AWS Certified Cloud Practitioner (1000/1000) with hands-on experience in containerized deployments (Docker), CI/CD automation, ETL optimization, and cloud-native development. Strong DSA foundation with consistent problem-solving practice in Java. Passionate about backend architecture, microservices, and DevOps.

Education

MIT Academy of Engineering, Pune

2022 – 2026

Bachelor of Technology in Computer Engineering

CGPA: 8.53/10

Experience

Backend Developer Intern – SteepGraph Systems Pvt. Ltd.

Feb 2026 – Jun 2026

Java, Spring Boot, Spring Security, AngularJS, ETL, PostgreSQL

Pune, India

- **Enterprise Backend Development:** Developed 15+ enterprise REST APIs using Java, Spring Boot, and PostgreSQL for large-scale enterprise applications, with secure endpoint access via Spring Security.
- **ETL Optimization:** Optimized ETL validation workflows by implementing debouncing logic, reducing redundant database lookups by nearly 50%.
- **System Design:** Designed 10+ modular service-layer components following SOLID principles and Clean Architecture, improving scalability and code maintainability.
- **Enterprise Integration:** Contributed to enterprise data migration pipelines, ensuring secure data transfer and business continuity.

Cloud & DevOps Intern – SortUs

Jun 2025 – Aug 2025

Node.js, MongoDB, AWS Lambda, GitHub Actions, REST APIs, Jira

Pune, India (Remote)

- **Backend Development:** Built scalable Node.js and MongoDB backend modules and documented REST APIs for seamless frontend-backend integration.
- **DevOps Automation:** Automated serverless deployments via AWS Lambda and GitHub Actions, cutting manual release effort by an estimated 30%; managed sprints in Agile/Scrum via Jira.

Projects

Knowledge Nexus – Full-Stack Mentorship Platform

GitHub Repository

React, TypeScript, Spring Boot, PostgreSQL, JWT, WebSocket, Google OAuth

- Architected a full-stack mentorship platform with secure JWT authentication and Google OAuth2 authorization, supporting mentor discovery and session booking.
- Built scalable REST APIs using Spring Boot, Spring Data JPA, and Flyway with real-time chat via WebSocket/STOMP; integrated Google Calendar API to auto-schedule sessions and generate Meet links.

Pediatric Bone Age Assessment – Deep Learning Research

Conference Paper

Python, TensorFlow/Keras, CNN Ensembles, Grad-CAM

- Built an ensemble deep learning pipeline for automated pediatric bone age estimation from X-ray images, achieving MAE of 6.79 months and R^2 of 0.951 on a stratified 85/15 train-test split.
- Applied Grad-CAM for model interpretability and co-authored a conference paper under faculty supervision; collaborated with a 4-member research team.

Secure Defense Framework – Zero Trust Donation Portal

GitHub Repository

Python, SQLite, RBAC, CSRF, Wireshark

- Designed a Zero Trust donation portal implementing authentication, authorization, RBAC, CSRF protection, and audit logging.
- Simulated OWASP Top 10 attacks (BOLA, brute-force, route tampering) and performed network analysis using Wireshark and Nmap.

Achievements

- **AWS Certified Cloud Practitioner (CLF-C02):** Achieved a perfect score of 1000/1000 – [view credential](#).
- **DSA Practice:** Consistent Java DSA practice covering Two Pointers, Sliding Window, Binary Search, DP, Graphs, and Recursion with a logic-first approach.
- **Smart India Hackathon 2024:** Grand Finalist at the national-level innovation competition.
- **Flipkart Grid 7.0:** National Finalist (top 10 of 1,600+ teams) for Drishaak, a computer-vision traffic-violation detection platform; shortlisted for Bangalore finale.
- **Hackathon Achievements:** Winner, MITAOE E-Summit Ideathon 2024; First Runner-Up, Cavista Tech Hackathon; Runner-Up, Datathon 2025.
- **Leadership:** Core Member & Design Lead, ACM Student Chapter, MITAOE.

Technical Skills

- **Backend:** Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT, OAuth2, WebSocket, Node.js
- **Languages:** Java, Python, SQL, JavaScript, C++
- **Frontend:** React.js, TypeScript, AngularJS, Axios
- **Databases:** PostgreSQL, MongoDB, MySQL (RDBMS)
- **Cloud & Containers:** AWS (EC2, S3, Lambda, IAM, RDS), Docker (PAAS-style containerized deployments)
- **DevOps & Tools:** Jenkins, GitHub Actions, CI/CD, Git, Maven, IntelliJ IDEA, Postman, Jira
- **AI/ML:** TensorFlow, Keras, CNN Ensembles, Deep Learning, Grad-CAM
- **AI-Assisted Development:** GitHub Copilot, Claude, ChatGPT (code review, debugging, productivity)
- **Testing:** JUnit, Mockito, Selenium
- **Core CS:** Data Structures & Algorithms, OOP, SOLID Principles, Design Patterns, System Design
